Test	Certified Value	Uncertainty	NIST SRM#	

		J	
pH at 25°C (Method: SQCP027, SQCP033)	6.865	0.02	185i, 186-I-g, 186-II-g
pH measurements were performed in our Pocomoke City, MD la	aboratory under ISO/IEC 170	025 accreditation (ANAB C	Certificate L2387.01) and are
certified traceable to National Institute of Standards and Techn	nology (NIST) Standard Refe	rence Material as indicate	d above via an unbroken chain of

comparisons. The uncertainty is calculated from the uncertainty of the measurement variation from sample to sample, the uncertainty in the NIST Standard Reference Material, and the uncertainty of the measurement process. The uncertainty is multiplied by k=2, corresponding to 95% coverage in a normal distribution. Volumetric glassware complies with Class A tolerance requirements of ASTM E 288 and NIST Circular 434; it is calibrated before first use and recalibrated regularly in accordance with ASTM E 542 and NIST Procedure NBSIR 74-461. Balances are calibrated regularly with weights certified traceable to the NIST national mass standard. Thermometers and temperature probes are calibrated before first use and recalibrated regularly with a thermometer traceable to NIST standards. All products are prepared according to master documents that assure manufacture according to validated methods. Batch records document raw material traceability and production and testing history for each lot manufactured.

Part Number	Size / Package Type	Shelf Life (Unopened Container)		
1539-1	4 L natural poly	24 months		

Recommended Storage: 15°C - 30°C (59°F - 86°F)

In taped cases (no staples)

Jose Pena (01/25/2024) Operations Manager This document is designed to comply with ISO Guide 31 "Reference Materials --Contents of Certificates and Labels."

This product was tested in an ISO 17025 Accredited Laboratory
